Replace Your Missing Tooth,
Preserve Your Bone, and Restore
Your Confidence with the Hahn™
Tapered Implant

DENTAL IMPLANTS: A BETTER QUALITY OF LIFE

With a fixed bridge, the teeth adjacent to the missing tooth are prepared to support three connected crowns.

A dental implant is placed directly into the bone underlying the area of the missing tooth. A crown is attached to the implant, leaving the adjacent teeth intact while preserving the bone of the jaw.

You have several options for replacing a missing tooth, including a removable partial denture, a fixed bridge or a dental implant. All of these options fill the empty space, but a dental implant is the only way to replace both the root and the crown of the tooth, giving the patient a permanent solution that most closely resembles natural dentition. While fixed bridges need to be replaced every seven to nine years, dental implants can last a lifetime with proper care. Because implants leave the adjacent teeth untouched and preserve the bone of the jaw, they help prevent other dental problems.

BENEFITS OF DENTAL IMPLANTS:

- Look and feel like a natural tooth
- Preserve chewing capability
- Protect adjacent teeth and long-term dental health
- Easy to floss
- Improved self-esteem, comfort and confidence

HOW TO STOP BONE LOSS

Left untreated, tooth loss leads to bone loss and, eventually, to loss of youthful facial contours. Fortunately, when an implant is inserted into the jaw, it provides the stimulation needed to preserve the bone and helps prevent premature aging.

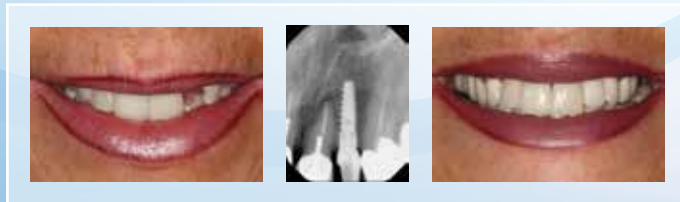

HAHN TAPERED IMPLANTS: SIMPLE, SAFE & EFFICIENT

The Hahn Tapered Implant was designed by Dr. Jack Hahn, a dentist and innovator who has placed more than 40,000 implants during the course of his 45-year career. Dr. Hahn, whose clinical observations and experience have served as the basis for some of the most widely used implant systems in dentistry, developed the Hahn Tapered Implant to improve upon his successful designs of the past, enhance the quality of care and make treatment as simple and efficient as possible.
